Three New Credentials Deployed Under ETM Functional Area

In coordination with the Engineering and Technical Management (ETM) Functional Integration Team (FIT), **DAU has deployed three new credentials to support the ETM workforce.**

CYBERSECURITY

[CCYB 003: Fundamental Secure Cyber-Resilient Engineering](#)

[CCYB 004: Intermediate Secure Cyber-Resilient Engineering](#)

TECH PORTFOLIO MGMT

[CENG 013: Technology Portfolio Management](#)

DAU Deploys First of Three Digital Literacy Training Tracks

Section 835 of the FY23 National Defense Authorization Act (NDAA) directed DAU to supplement existing training related to software acquisitions and cybersecurity software/hardware acquisitions to increase digital literacy related to such acquisitions. The **first of three training tracks** in support of the NDAA requirements deployed on August 30, 2024**. The Digital Literacy Basics curriculum is a 5-course series.** Additional details about the training can be found HERE.

The second track will focus on general civil applications of the technologies, and the third track will focus on DoD applications of the technologies.

Seeking Summer 2025 DCTC Internship Projects

The **Defense Civilian Training Corps (DCTC) Program is seeking partner organizations to host DCTC project-based internships in Summer 2025.** These summer internships are a critical component of the DCTC Program. Internship projects enable scholars to apply what they have learned in the DCTC classroom, engage in multidisciplinary teamwork to solve real-world DoD challenges, and gain a valuable security clearance. Internship hosts mentor scholars and help plan their post-graduation job placement. Each DCTC scholar's pathway to employment follows the successful completion of the project-based internship and engagement with partner organizations.

Proposals are due by November 7, 2024, and more information can be found HERE.

SUMMER 2024 INTERNSHIP SNAPSHOT

27 projects across the services

91% of scholars secured one of their top 3 internship choices, with all 86 scholars matched

**80%** of internship projects have groups of 3 or more scholars

20 (out of 27) internship projects involve groups from at least 2 universities

Acquisition Support at DAU

DAU is continually supporting the development of skills in Digital Acquisition. With new training opportunities being developed, DAU has created a new site to help the workforce understand what is available to support their continuous learning.
Check out the new site HERE.

Updated ETM and T&E Info Sheets Published

The ETM and Test and Evaluation (T&E) information sheets have been updated to better support the workforce. Featured updates include the latest in credential deployments and available learning assets for credentials in development, as well as changes to certification training requirements.

Both info sheets are cleared for public release and can be accessed HERE.

Upcoming Events

OCT 24

MOSA: A Sociotechnical System Perspective

This webinar will focus on exploring Modular Open Systems Approach (MOSA) through a sociotechnical lens, providing a foundation for understanding its implementation across design, development, manufacturing, and acquisition processes. To register, click HERE.

NOV 07

System Diplomacy: Aligning Stakeholders in MOSA

This webinar will focus on ways to unify diverse perspectives in MOSA implementation. To register, click HERE.
